

CHAINLION

Assessment Service Agreement

Prepared for: Mining Magnate Token (MMT)

Date: 2022-05-10

SERVICES AGREEMENT

This Assessment Service Agreement (including the Terms of Service enclosed, the “Agreement”), dated as of May 10, 2022 (the “Effective Date”), is by and between **CHAINLION TECH LTD.** (“CHAINLION”), and MMT.

Description of Source Code Assessment

CHAINLION will examine Customer’s “source code” for syntactical, semantic, and logical errors with a methodology including "but not limited to":

- Black, white and gray box test
- Static Analysis
- Coding design audit
- Business logic audit

The Services consist of:

- A primary "assess and review" of all source code in scope.
- Open communication channel between engineering teams for the purpose of feedback, clarification, and discussion on issues and suggested remediations.

CHAINLION will perform a secondary review after Customer has remediated and implemented suggested changes. The scope of this review will be limited to assessing that any improvements, errors or vulnerabilities previously identified have been properly remediated or that the suggested modifications have been implemented without opening up new issues.

If the Customer’s code does not pass CHAINLION’s assessment process, CHAINLION will provide Customer with issues identified and suggestions for addressing the issues. After which, the Customer will decide whether to update or revise their “source code” .

CHAINLION reserves the right to assess additional fees and adjusted timelines if the Client introduces a "new" or "previously unreviewed code" that is outside the scope of "remediated or implemented suggested changes" based on CHAINLION 's original review.

Scope of Source Code Assessment

CHAINLION will assess the following files based on client’s provided source code repository/commit hash:

The assessment process will utilize a mixture of expert manual review, static analysis, and techniques. This mechanism will utilize public chain architecture system in order to cover a majority of the application's logic.

The CHAINLION team will conduct multiple iterations on the following contracts:

Service Fees

▪To deal with cost: 1500 u

▪Terms of payment: Party A shall pay 1500U within 2 days after the signing of the entrustment Agreement by both parties, Make sure work is officially underway
